# About Us.

## Introduction

Welcome to SPECTRE PLASTER MACHINES CONSTRUCTIONS EQUIPMENT TRADING - SOLE PROPRIETORSHIP L.L.C.

Your specialist for plastering technology and accessories of the highest quality. As a family-run company founded and based in Germany, we offer decades of experience in the construction sector and an international customer base. We develop innovative and sustainable solutions that exceed your expectations.

# Mission & Vision.

## MISSION

Our mission is to provide you with products and solutions that make your work easier and improve the quality of your projects. Trust SPECTRE PLASTER MACHINES CONSTRUCTIONS EQUIPMENT TRADING , your partner for plastering technology and accessories of the highest quality.

## VISION

To become a global leader or industry benchmark by providing innovative, reliable, and high-quality products and services. We want to further develop our product range and spread it over a large area. We aim to produce different, functional products by making use of all the possibilities of technology. We are thinking of continuing our production and services without giving up our quality, durability and reasonable price policy in the future.

# What We Serve

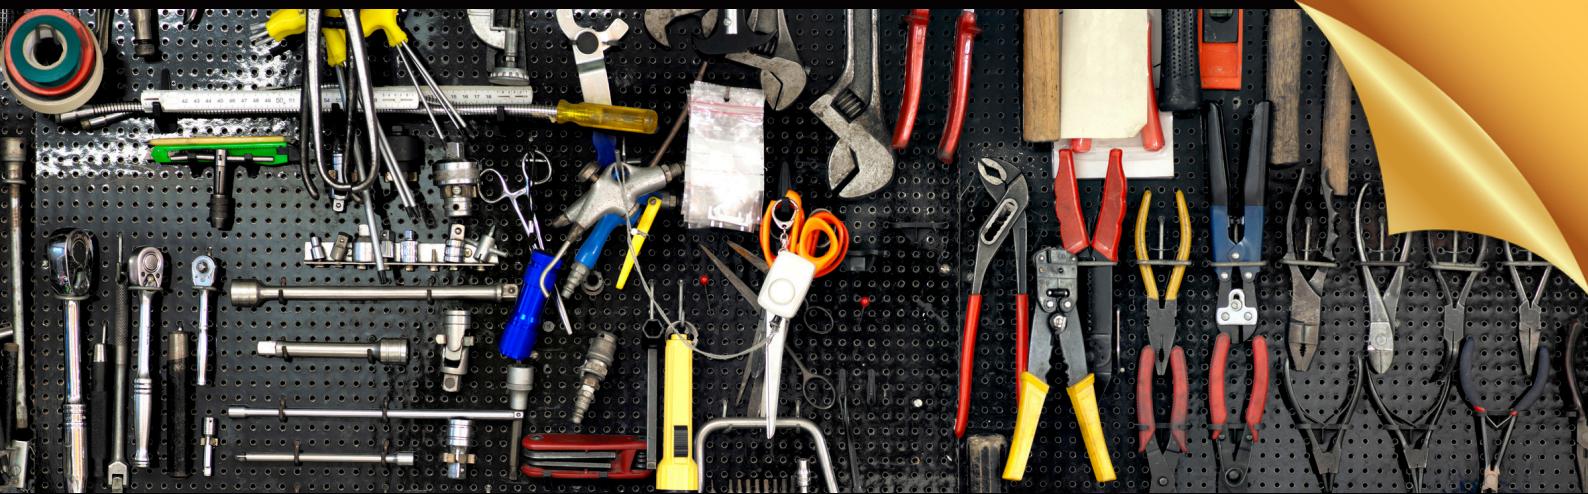

## OUR PRODUCT RANGE INCLUDES:

### PLASTERING, CONVEYING, AND MIXING MACHINES:

- Plastering Machines: Our STOCK - PlasterOne® machines, including the flagship PlasterOne® No.1, stand for precision and efficiency. They are suitable for a variety of applications and ensure professional results in every project.
- Conveying Machines: Our robust and reliable conveying machines guarantee smooth material transport on the construction site.
- Mixing Machines: With our efficient mixing machines, you get uniform and homogeneous mixtures that are essential for high-quality processing.

### SPARE AND WEAR PARTS:

- Mixing Augers: Our durable mixing augers ensure a consistent mixture of plastering materials, contributing to a perfect consistency of the mix.
- Rotors and Stators: High-quality pump units that ensure efficient transport of plastering materials and contribute to the constant performance of your machines.
- Mixing Pipe Cleaners: Essential tools for the regular maintenance and cleaning of your plastering machines to extend their service life.

# Our Product Range

## OUR PRODUCT RANGE INCLUDES:

### ACCESSORIES:

- Conveying and Mortar Hoses: Specifically designed for use with plastering machines, ensuring smooth and efficient material transport.
- Fine Plastering Tools: For precise and even distribution of plaster materials, ideal for professional applications.
- Blowing Hoods: Protect the environment from dirt and ensure clean and efficient work.
- Power Cables: High-quality cables that provide a reliable power supply for your machines.

### CONSUMABLES:

- Profiles and Mouldings: End caps and corner protection strips, as well as plaster profiles, essential for precise and clean work.
- Adhesive Tapes and Surface Protection: Masking tapes, gold tapes, window films, protective films, and fabric masking specifically designed for demanding projects.

### TOOLS FOR PLASTERERS:

- Trowels: For a perfect finish to your plastering work, available in various sizes and designs.
- Putty Knives: For precise and clean results when smoothing and shaping plaster and filler materials.
- Spirit Levels: For the highest accuracy when leveling plaster surfaces.
- Wide Scrapers: Ideal for large-scale application and smoothing of fillers and plasters.

# OUR PRODUCTS

## STOCK – PLASTER ONE® MACHINE

The STOCK - PlasterOne® No.1 plastering machine is a powerful mixing and mortar pump suitable for all machine-processable dry mortars based on gypsum, lime, cement, or clay. It features an integrated pressure booster pump and operates with 400 V, 3 phases, and 50 Hz. The material container is separated from the pump and mixing unit, allowing for continuous and automatic operation. The machine can be refilled at any time during operation. The PlasterOne can be filled with bagged goods or directly from a silo or container – optionally also with a blowing hood and an automatic filling system. Thanks to its high delivery performance and range, the PlasterOne can be combined with other machines and used flexibly.

### Applications:

- Gypsum plaster, lime-gypsum plaster, cement plaster
- Insulation and lime-cement plasters
- Base coats and groove mortars
- Masonry mortars, flow screeds, and flow fillers
- Adhesive and reinforcement mortars

# Spare and wear parts

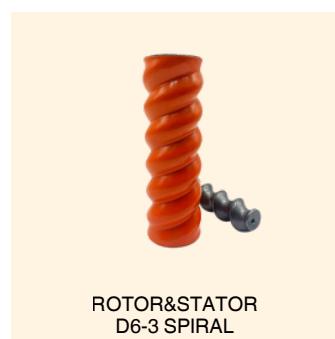

We offer high-quality replacement and wear parts that keep your machines running reliably. Robust mixing screws ensure consistent material mixing, while rotors and stators ensure efficient material conveyance. Mixing tube cleaners remove residues and extend the service life of your machine. Drive claws ensure smooth power transmission between the motor and mixing screw, and flow meters meter the water volume for optimal material consistency – for consistently high performance and perfect results.

# Accessories

Our range of accessories offers everything you need for optimal use of your plastering machine. Robust conveyor and mortar hoses ensure smooth material transport, while fine plastering equipment enables fast and precise distribution. Injection hoods minimize material loss and protect the surrounding area from contamination. High-quality power cables guarantee a stable power supply – everything is perfectly tailored to the requirements of your construction site, ensuring your projects can be implemented efficiently and professionally.

## DIESEL SUPPLY

WE PROVIDE OUR CUSTOMERS THE BEST OF THESE PRODUCTS

- DIESEL FUEL
- LUBRICANTS AND GREASE
- OILFIELD CHEMICALS
- PETROCHEMICALS
- COAL AND FIREWOOD
- REFINED OIL PRODUCTS
- IGNITION MATERIALS
- TAR AND ASPHALT
